Anaconda

ANACONDA Ti-Lite Big Daddy Heat Control Chair

Art.-No. 7158777
EAN 4039507280871

Details

This chair will not only warm your heart, the built-in heating mechanism under the seat warms your legs, buttocks and back at the same time thanks to the rising heat. The heating mechanism is controlled via USB ports using a power bank (portable battery). As far as the material of the frame is concerned, with the Freelancer Ti-Lite series we have an extra light and stable material at the same time. The sturdy frame is 36% lighter than aluminum and 77% lighter than an ordinary steel frame. Furthermore, the new material absorbs 50% more vibrations, which gives it incredibly high stability and elasticity (shock resistance). With the new Anaconda Freelancer Ti-Lite Big Daddy Heat Control, maximum seating comfort is guaranteed by an air-permeable, breathable fabric, which also dries very quickly. The backrest can be adjusted up to an angle of 45 degrees. A new technology, the quick-push technology, with so-called "snap poppers" has been installed to adjust the height of the legs.

? Built-in heating mechanism in the buttocks area, which is controlled and powered by a power bank (not included).

? Pleasant warmth on cold autumn and winter days in the area of the back, legs and buttocks

? including 2x USB cable and side pocket for the power bank)
